## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-40, drawn to an engine air intake system for a work vehicle, classified in class 180, subclass 68.1.
- II. Claims 41-44, drawn to a method of obtaining clean engine intake air for a work vehicle, classified in class 180, subclass 68.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)).

In this case the apparatus as claimed can be used to practice a first materially different process. For example, the air pre-cleaner as claimed (claims 12 and 32) is not disclosed as being configured to or capable of removing a [third] debris from the second ambient air as claimed in the process claim 42. Therefore, the apparatus as claimed can be used to practice a different process wherein a [third] debris is not removed from the second ambient air.

Furthermore, the apparatus as claimed can be used to practice a second materially different process. The apparatus can be used for educational purposes in a display configuration in order to show the structure of an engine air intake system. In this process, none of the claimed steps are practiced.

Art Unit: 3618

Additionally, the process as claimed can be practiced by another and materially different apparatus. The claimed apparatus includes a first inlet door (claim 39) which must close and open the baffle inlet hole as claimed (claim 34). The process as claimed includes the step of "closing the hole in the baffle" (claim 43, lines 2-3). This step of the process can be practiced by a materially different product, such as a similar apparatus not including a first inlet door.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Hope W. Carter on 03/10/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3618

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vaughn T. Coolman whose telephone number is (571) 272-6014. The examiner can normally be reached on Monday thru Friday, 8am-6pm EST.
